

Aztech "WaveTide" wavetable addon board headers, viewed from the sound card

#### Notes:

- > MIDI\_TXD connects directly to pin 12 of the game port and i80C52 MCU pin 13 (TXD/P3.1).
- > /PDWN connects to pin 23 of the CS4231A decoder, essentially acts as a reset when active.
- > Pins 17 and 19 of the EXPCON header connect to i80C52 MCU pins 16 and 17 respectively, rest of the pins connect directly to the ISA bus.
- > Pinout based on Aztech Multimedia Pro 16 ABO, 138-MMSN850.
