EVEREX
EVER for EXcellence®

▲ More than 100,000 products shipped monthly.
▼ PC Peripherals telemarketing sales floor.

▲ "Hands-on" manufacturing.
▼ New 120,000 square foot production area.

Strength. Quality. Value. Like the legs of a triangle, strength, quality and value form the framework for Everex Systems and the foundation for Everex products. In 1984, Everex started with a simple idea and a clear vision of the future. Six years later that strength of vision has been translated to the rock-solid financial strength of one of the computer industry's largest computer and peripheral manufacturers. And, the simple idea of quality and value has built a product line that encompasses every major computer environment — from DOS and UNIX to Macintosh and NeXT.

Unconquerable Edge

Every Everex product is designed with the overwhelming strength of a "no-compromise" engineering staff that accounts for nearly 20 percent of all Everex employees. Each product is built with a unique "active" manufacturing process that shuns automation. This hands-on process guarantees that the product's performance meets the design expectations. It is this level of quality that makes Everex value more than just a question of price.

Strength. Quality. Value.
Everex's unconquerable edge.

The following product listings represent a partial list of the wide range of Everex products. For more information about products or pricing, call Everex or the dealer nearest you.

"Everex seems to make just about anything you can plug into a PC — and the PCs to boot."

— PC Magazine

The depth and breadth of Everex's engineering excellence shows its strongest suit in the Everex STEP line. STEP computers represent the best in leading edge technology and are consistently rated among the highest performance machines in every CPU category. Mainframe technology, Everex ASICs and Advanced Memory Management Architecture (AMMA) provide Everex STEP computers with the perfect blend of quality, reliability and flat-out performance.

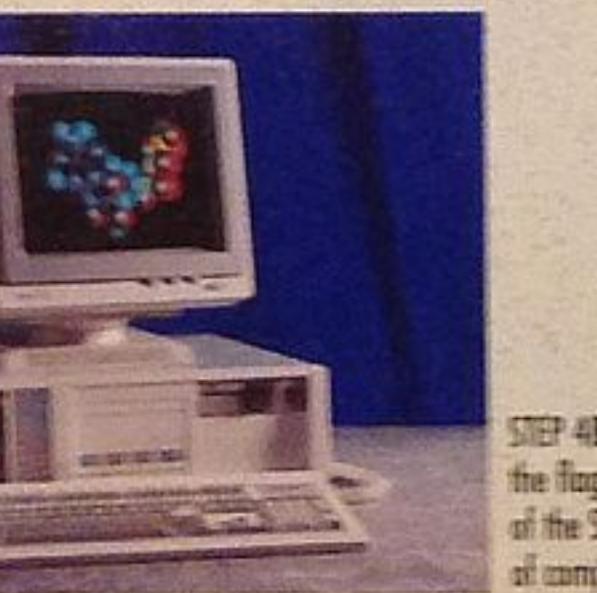

Features

AT®-compatible systems

- Zero wait state operation
- Advanced Memory Management Architecture, AMMA (except STEP 386is, 286/16 and 286/12)
- 1MB memory standard (except STEP 286/12)
- Multiple configurations and chassis sizes available

"Everex has again achieved top billing."

— InfoWorld,

STEP 386is	16MHz	-	1MB
STEP 486/33	23MHz	128	1.5MB

Everex STEP Multi-user Workstations and ESIX Software

Sharing the Power

▲ STEP 8825, ESIX System V

The same engineering quality and processing power behind the STEP computers can be found in our multi-user workstations and software. The STEP 8820 and 8825 use Motorola's™ 88000 RISC architecture for 17- and 21-MIPS performance levels respectively. Even while running DOS and UNIX® simultaneously, Everex's own ESIX implementation of UNIX System V offers one of the most complete multi-user operating systems available on the market.

...more

Workstations

- Motorola 88000 RISC architecture
- Run DOS and UNIX simultaneously

ESIX

- Complete implementation of UNIX System V
- XENIX® binary compatibility
- Full software development system, including utilities and tools

Representative Products

ESIX offers one of the most complete UNIX-based packages.

Workstation	Dual Processor	MIPS
STEP 8820	Motorola 88000 RISC, Intel® 80386	17
STEP 8825	Motorola 88000 RISC, Intel 80386	21

"Smack in the middle of the winner's circle."

— PC World

▲ STEPserver, SpeedLink/MCA, CommUnity-DOS, SpeedLink/PC16

Features.....

File server

- 33MHz, 386-based computer
- Novell® certification for the entire unit
- NetWare®-ready, pre-compsurfed 150MB, 320MB or 650MB hard drive
- Supports up to 2.6 gigabytes of total hard disk capacity

ARCNet board

- 2K of static RAM
- Fully compatible with SMC Model PC110 ARCnet board

CommUnity-DOS™

- DECnet™ Ethernet software
- 64K of dual-ported static RAM (16K for SpeedLink/MCA)
- Support IEEE 802.3 10BASE5 and 10BASE2 or 10BASET draft compliance

Ethernet boards

- 64K of dual-ported static RAM (16K for SpeedLink/MCA)
- Support IEEE 802.3 10BASE5 and 10BASE2 or 10BASET draft compliance

"Working on the leading edge of technology."

— Infonetics, Inc.,
Product Evaluation Group

Representative Products

File server	Processor	System memory
STEPserver	80386/33	4MB or 8MB
Ethernet board	Bus	Static RAM
SpeedLink/MCA	Micro Channel	16K
SpeedLink/PC16	16-bit	64K
ARCNet board	Bus	Static RAM
SpeedArc	8-bit	2K

▲ Excel 60F, Excel DAT 1.3, Excel 150

Invest in an Everex tape backup system and you'll protect your hard disk data from the inevitable crash. Everex tape systems make hard disk disasters less disastrous. By operating off an existing AT or PS/2® floppy controller, Everex floppy-based tape units provide a value-oriented means of protecting hard disk data. Everex streaming drives provide uncompromising reliability and software so easy to use you'll wonder why you ever took a chance without it. Our flagship digital audio tape (DAT) systems provide the ultimate in high-speed, high-capacity backup.

Features

Floppy-based

- Capacities of 40MB or 60MB

Digital

- Includes Everex tape backup software

- Backup burst speed of up to 4MB per second

- Backup rate of 3.75MB per minute

- Novell utility

Streaming

- Capacities of 40MB, 60MB, 125MB or 150MB

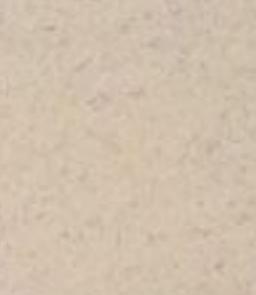

- Includes Everex tape backup software

- Backup rate of 5MB per minute

- Optional Novell utility

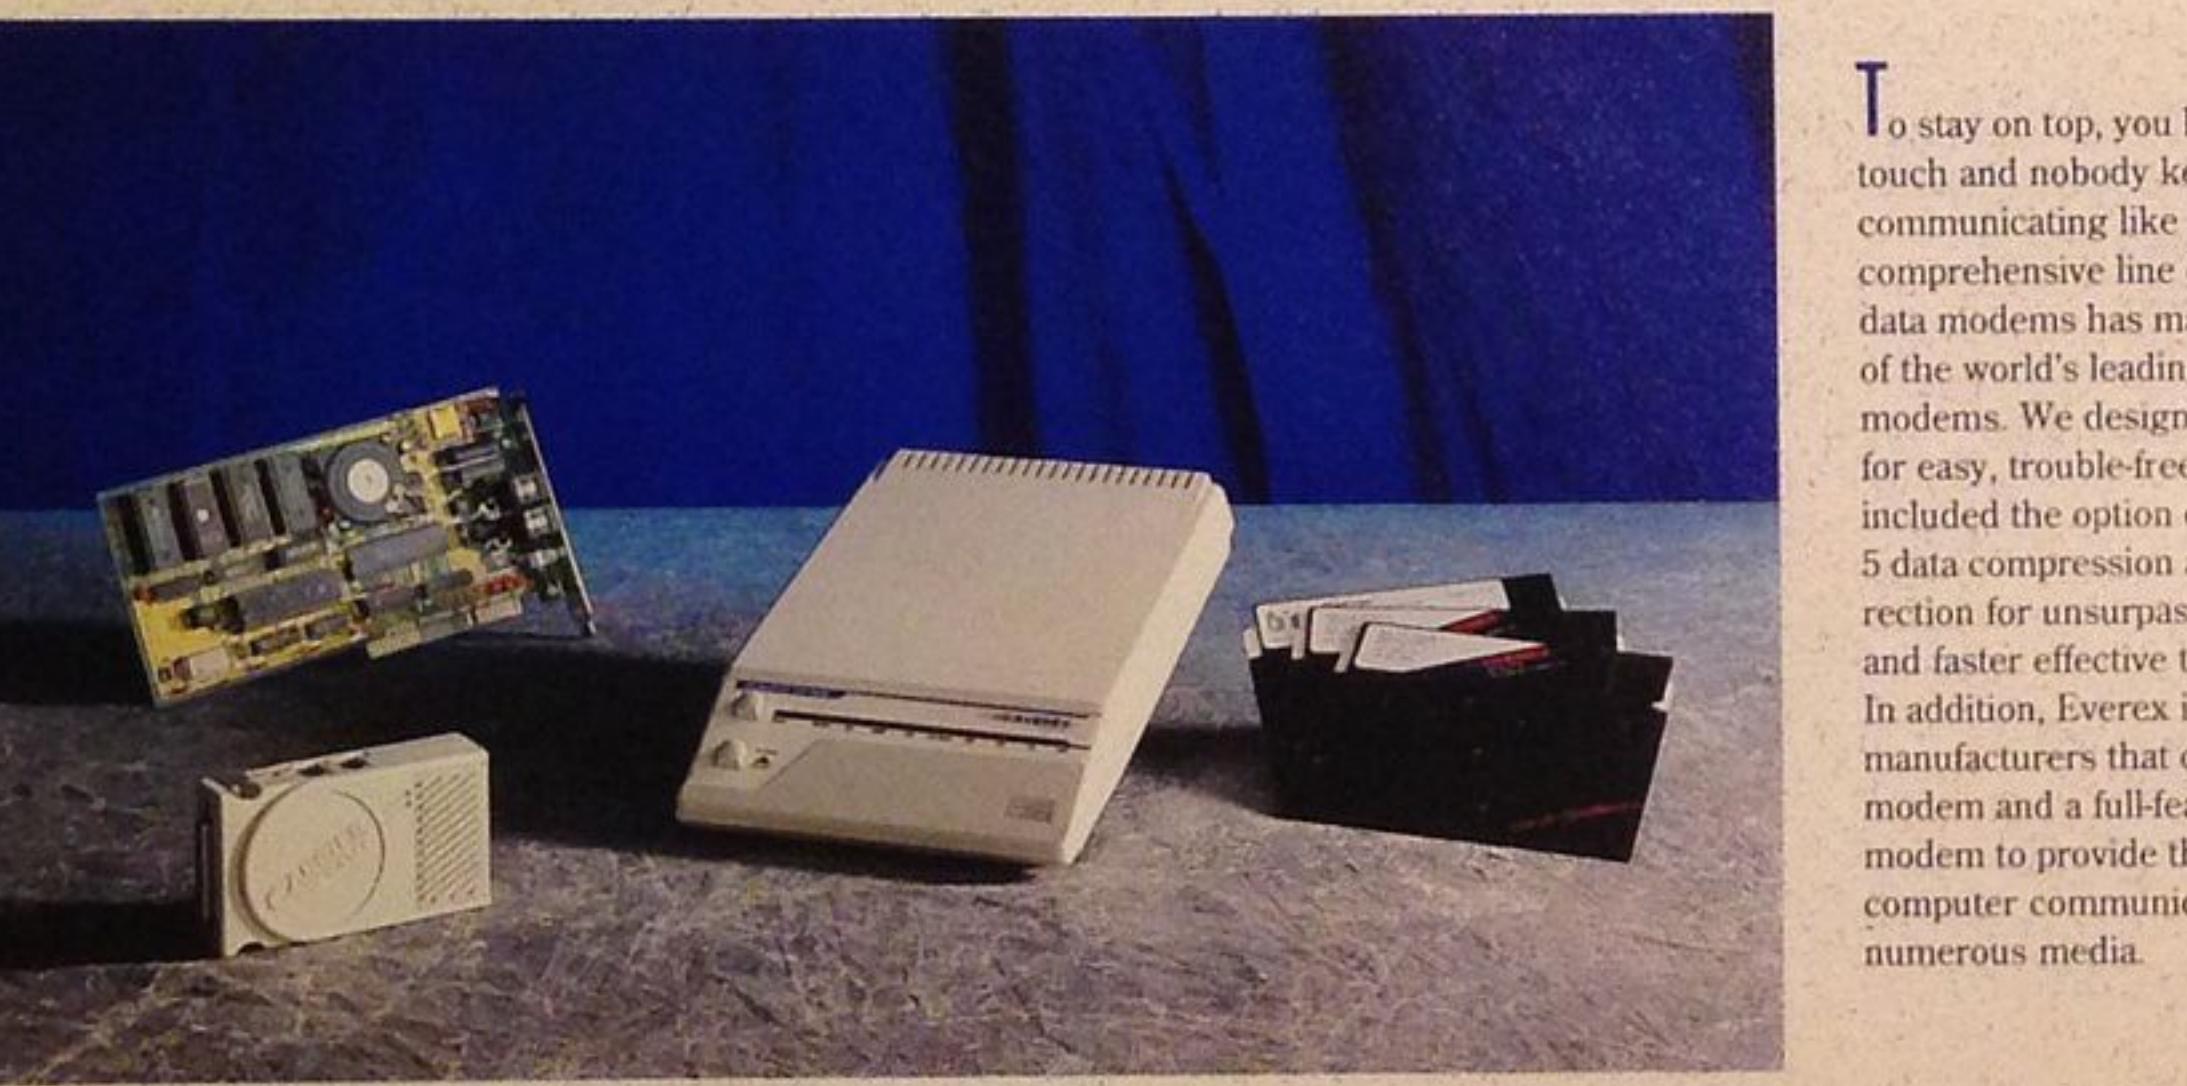

"It ranks at the top of the list."

— PC Magazine,
on the Excel 40F

Representative Products

Model	Type	Backup rate	Capacity
Excel 60F	floppy-based	3.75MB/min.	60MB
Excel 60T	streaming	5MB/min.	60MB
Excel 80	streaming	5MB/min.	80MB
Excel 150	streaming	5MB/min.	150MB
Excel DAT 1.3	digital	10MB/min.	1.3 gigabyte

▲ Evercom 24+, Carrier 24, EverFax 24/96

To stay on top, you have to stay in touch and nobody keeps computers communicating like Everex. Our comprehensive line of premium data modems has made Everex one of the world's leading suppliers of modems. We designed our modems for easy, trouble-free operation and included the option of MNP® Class 5 data compression and error correction for unsurpassed reliability and faster effective transmissions. In addition, Everex is one of the few manufacturers that combines a fax modem and a full-featured data modem to provide the full power of computer communications across numerous media.

Features...

Data modem

- Includes BitCom™ communications software
- Hayes,® Bell and CCITT-compatible
- Automatic data-to-voice switching
- Built-in diagnostics
- Includes installation software
- Built-in speakerphone, LED indicators and speaker (external models only)

Fax modem

- Includes EFax fax software
- Pop-up scheduling from within other applications
- Fax directory of up to 400 names and numbers
- Distribution lists for sending documents to multiple recipients
- Automatic generation of cover sheets and headers

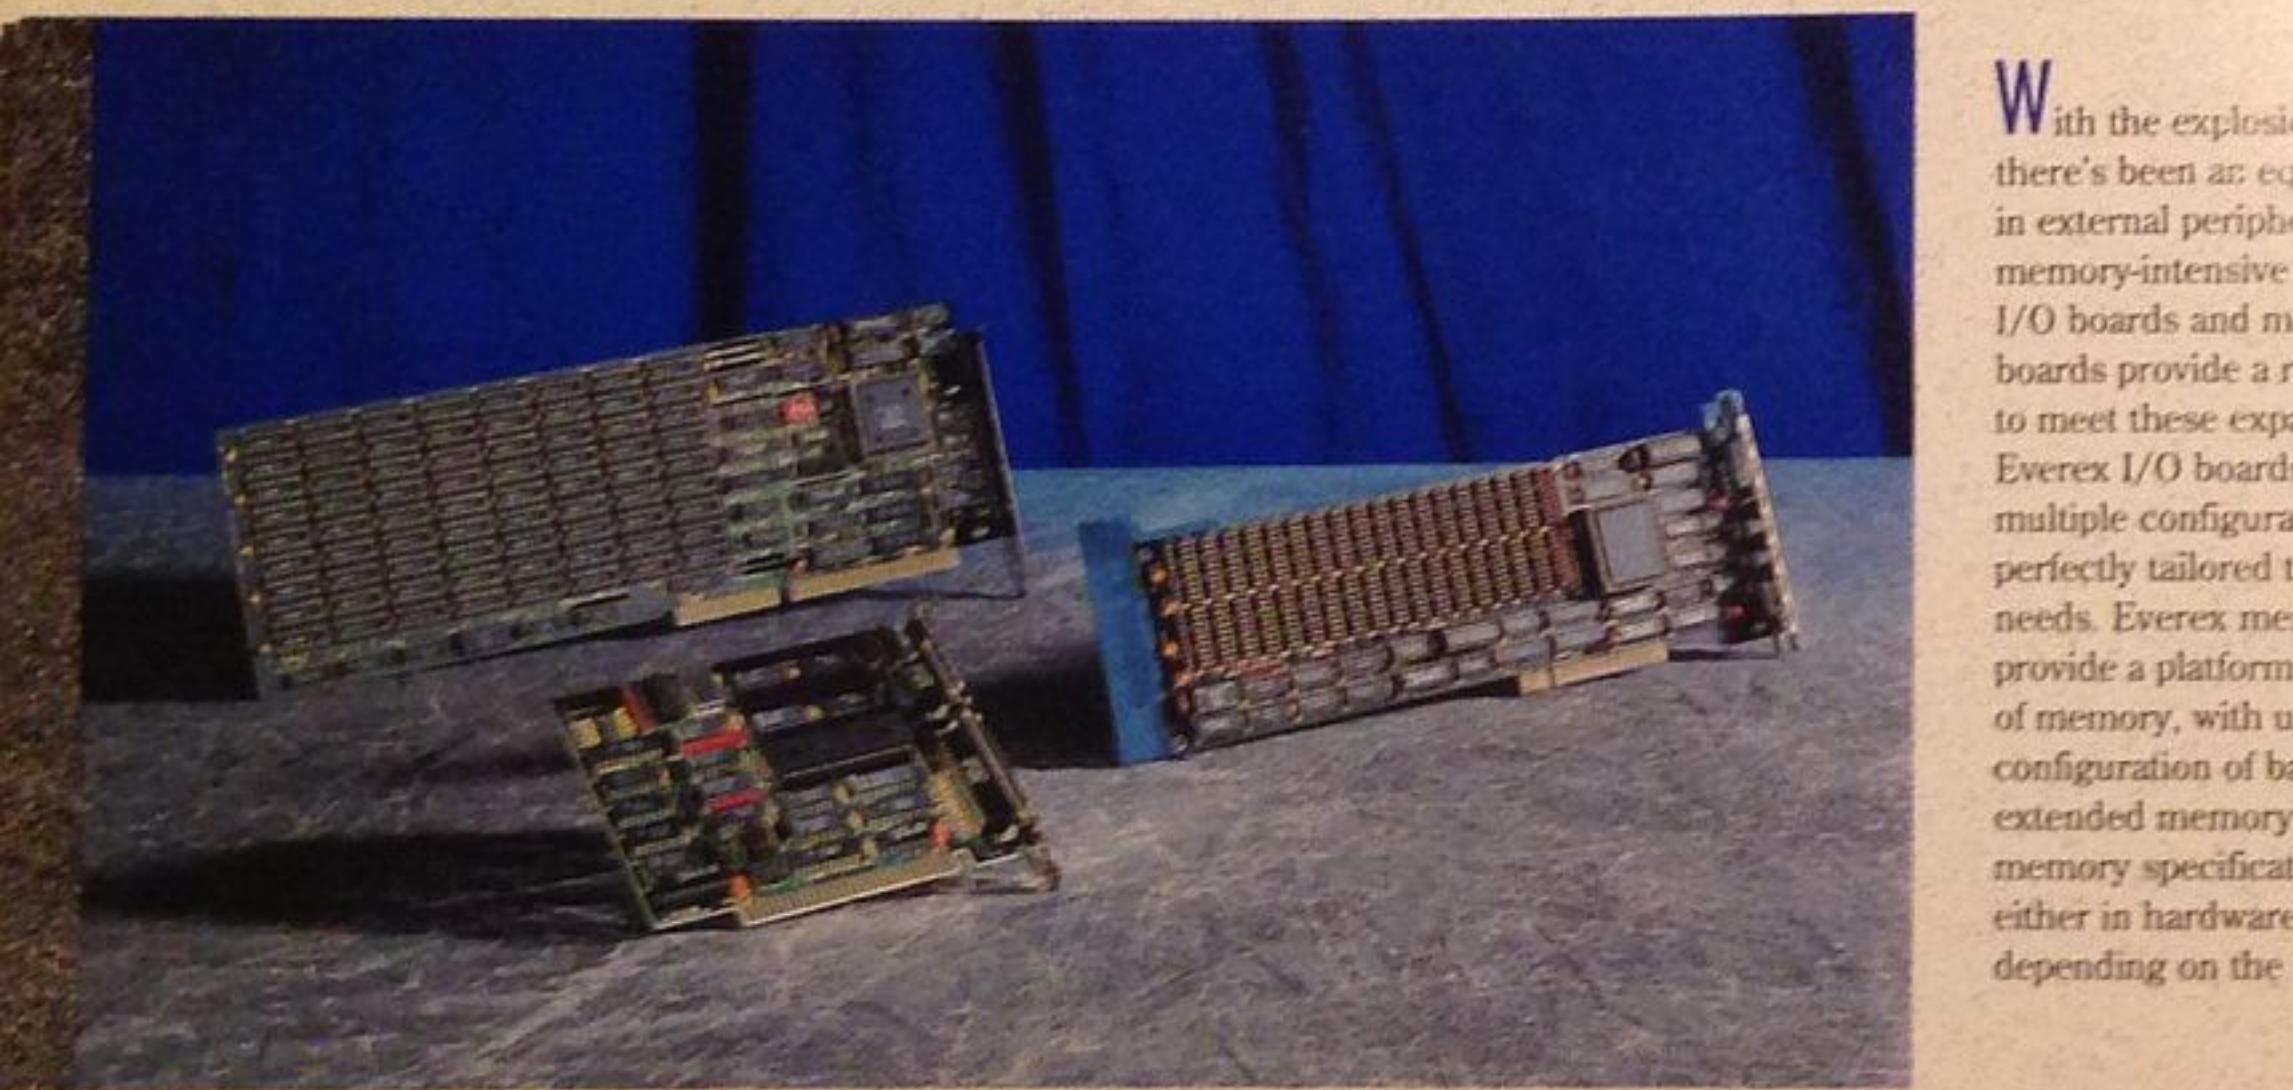

Representative Products

RAM 10000	16MB	software	AT

▲ Micro Enhancer, FontView, Viewpoint VGA

Quality graphics should be clean and crisp, no matter what the price. Everex graphics boards provide crystal-clear graphics output in resolution modes from Hercules® compatible monochrome to extended VGA. The Viewpoint VGA is Everex's flagship graphics board with video memory of up to 512K and full register-level compatibility. The Everex FontView monochrome board outperforms every comparable board and displays your chosen fonts on-screen so you really see what you're typing.

Everex Viewpoint VGA,
gilt-edged performance.

Features...

Register-level graphics

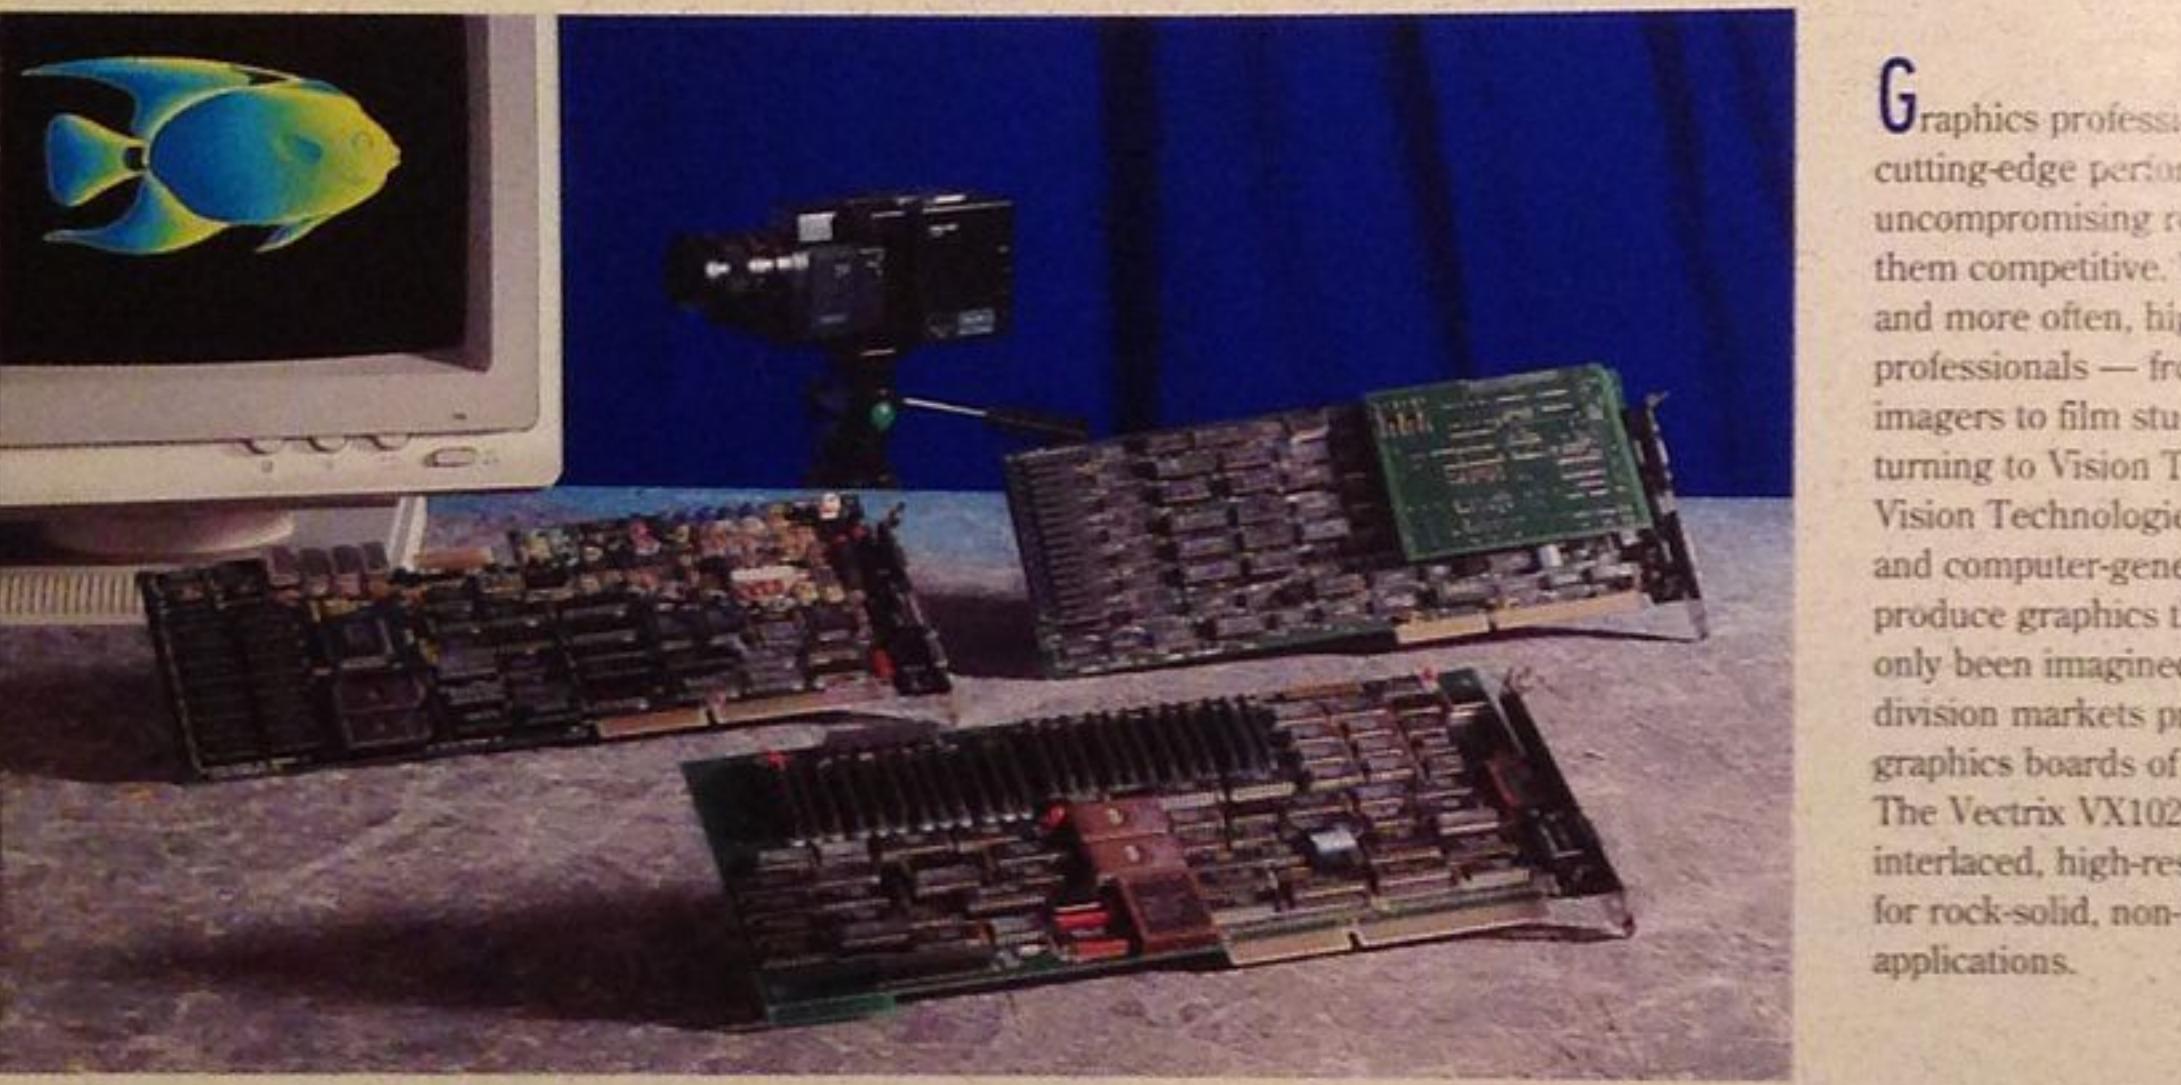

- VGA, EGA, monochrome, high-resolution monochrome and text rendering boards
- ASIC technology
- Extended and standard graphics and text modes
- Standard 256K of video memory (except Evergraphics), VGA and Ultra-graphics can be expanded to 512K
- Include software drivers for most popular software

"Doesn't get any better."

— InfoWorld

Representative Products

Model	Modes	Max. resolution
Viewpoint VGA	Extended VGA, EGA, CGA, Hercules	1024 x 768
Micro Enhancer	Extended, EGA, CGA, Hercules	640 x 480
FontView	Extended, Hercules	1024 x 768

▲ Vision VGA, Vectrix VX1024, Vision 16

G

Graphics professionals rely on cutting-edge performance and uncompromising reliability to keep them competitive. That's why more and more often, high-end graphics professionals — from medical imagers to film studios — are turning to Vision Technologies. Vision Technologies marries video and computer-generated images to produce graphics that had once only been imagined. The Vectrix division markets professional graphics boards of a different sort. The Vectrix VX1024 provides non-interlaced, high-resolution output for rock-solid, non-flicker CAD applications.

Features

Image capture boards

- Support analog monitors
- Support standard video resolution
- Vision 16 and 32 feature NTSC and PAL versions

Graphics boards

- Standard and extended VGA modes
- Vision VGA provides video-compatible output

Image capture, graphic arts and presentation software

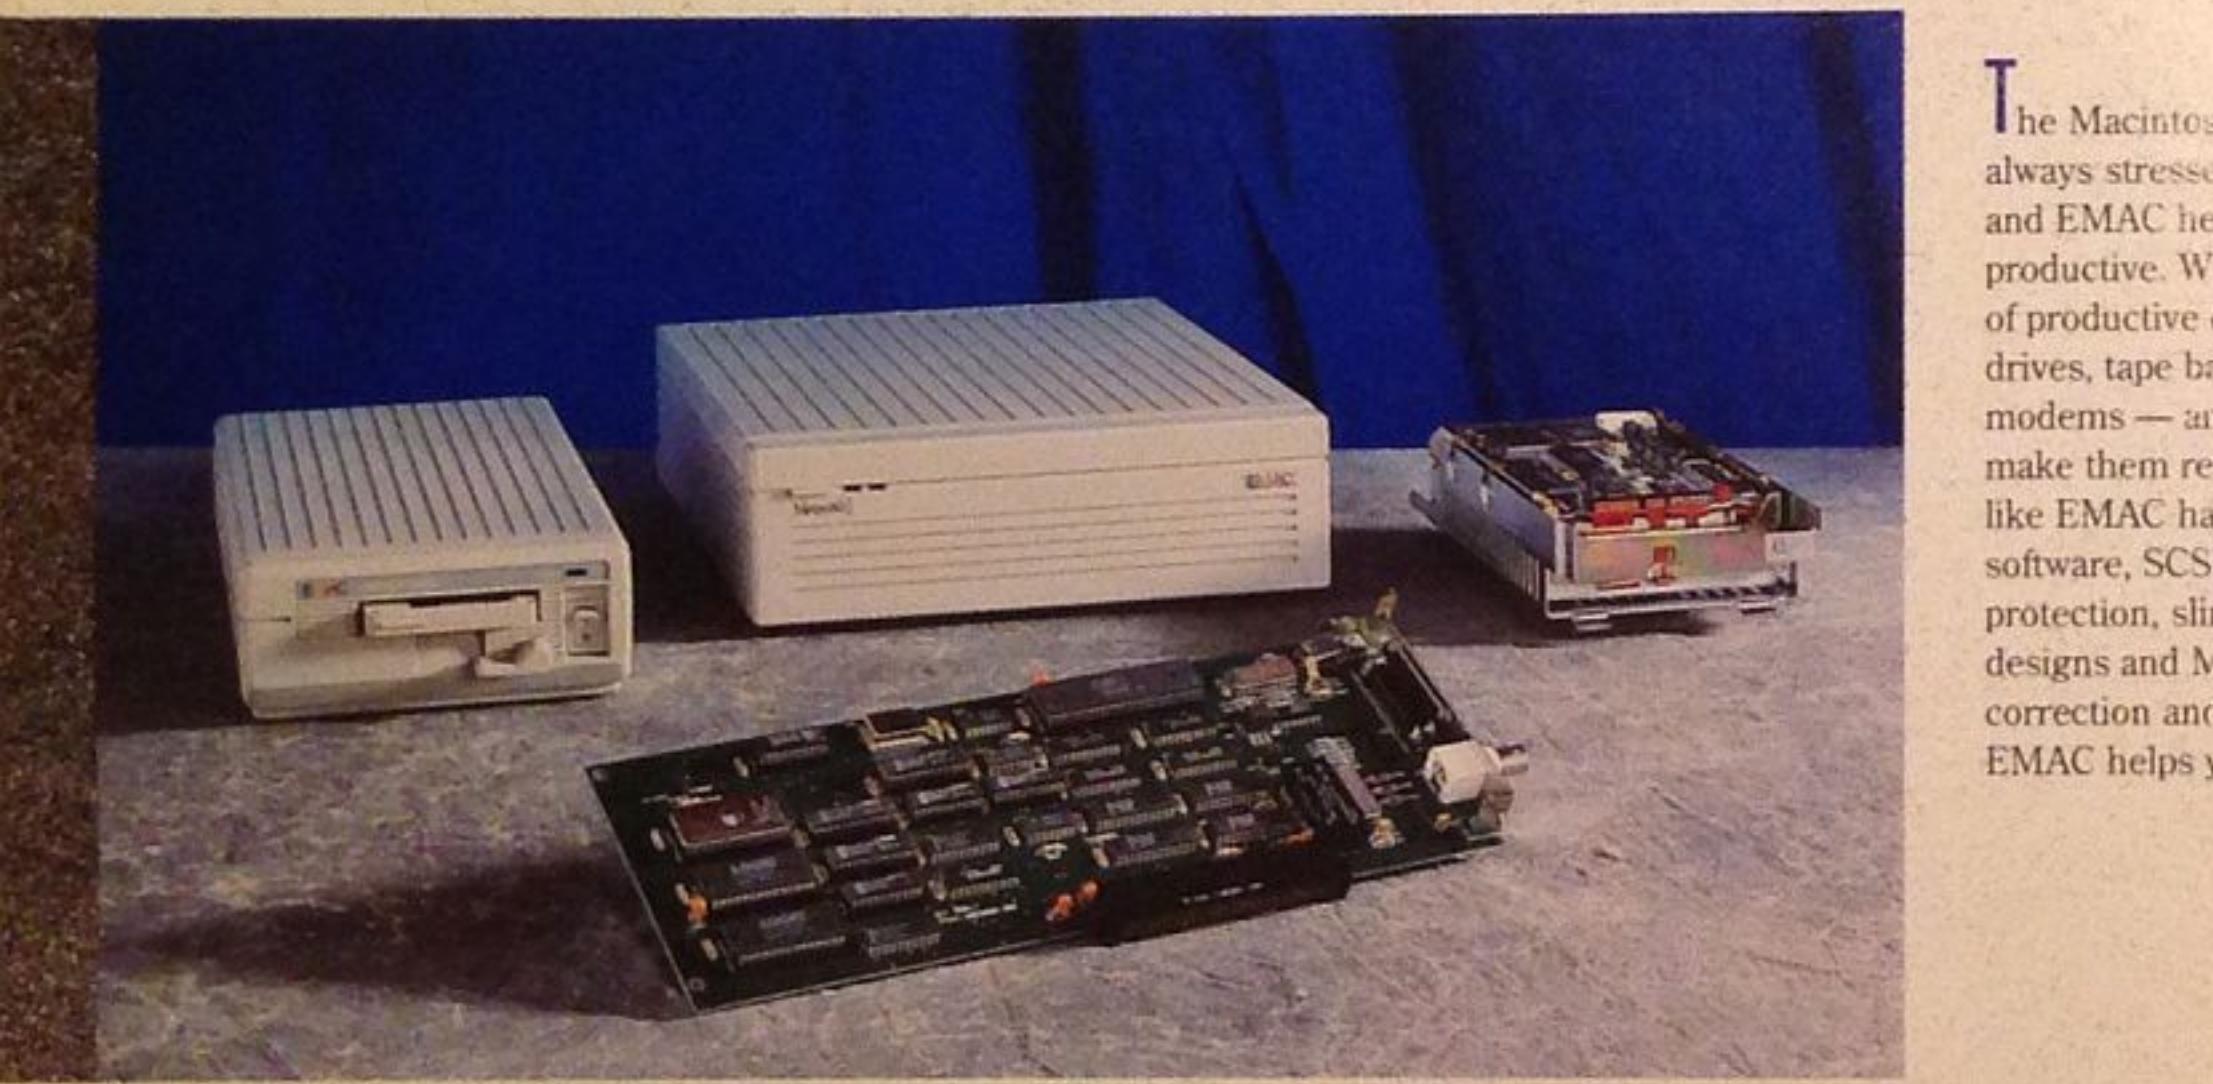

- High-resolution, color graphics
- Configured for use with Vision boards

Representative Products

Model	Max. Resolution	Output
Vision 16	512 x 484	R, G, B, Sync, composite
Vision 32	767 x 574	R, G, B, Sync, composite, video
Vision VGA	1024 x 768	video, VGA
Vectrix VX1024	1024 x 768	VGA, single or dual

"An incredible setup."

— Camcorder Magazine

▲ Impact Tape, Metro 80, SpeedLink II, EMAC-170ID

Features.....

Hard drives

- Automatic head park
- Preformatted with the latest Apple® System Folder
- Include EMAC disk management software and Norton Utilities® for the Macintosh

Tape backup

- Includes award-winning Retrospect™ software from Dantz Development
- Backup and true archival functions
- Network and prescheduled backup support

Network

- Adapters and CommUnity-Mac™ software for Ethernet networks
- Adapter and TOPS® software for AppleTalk® networks

Modem

- 2400 bps
- MNP Class 5 error correction and data compression

"Standouts ... sleek cabinet design."

MD2400	2400	Class 5

▲ LaserScript, InterFax 24/96, Scan 300/6S

Abaton InterFax 24/96.

Features...

Scanners

- 75 dpi to 300 dpi selectable resolution
- Flatbed design
- 4- and 8-bit models
- Includes scanning and image-editing software

Fax modem

- Combines data and fax modem
- Includes fax software
- Scheduler for unattended operation
- Sends and receives in background

Printers

- 300 dpi resolution
- PostScript compatible
- Includes 35 Bitstream® fonts
